

If you identify an “EVENT” (complications or audit filters) please let the TPM or one of the Trauma PI Coordinators know and send a short email to TraumaPI@mmc.org. You can also leave a confidential voicemail message for the program staff at 662-6777

Trauma Service Morning Report Important Performance Improvement Items

COMPLICATIONS
Acute Kidney Injury
Acute Respiratory Failure
Acute Sinusitis
Adult Respiratory Disease Syndrome (ARDS)
Aspiration/Aspiration Pneumonia
Burn/Wound Cellulitis
Burn/Wound Infection Post Incision
Cardiac Arrest with +Resuscitative Efforts
Central Line Associated Bloodstream Infection (CLABSI)
CNS Infection
Coagulopathy
Compartment Syndrome
Decubitus/Skin Breakdown
Deep Vein Thrombosis (DVT)
Dehiscence/Evisceration
Drug and Alcohol Withdrawal Syndrome
Empyema
Esophageal Intubation (In-House)
Fat Embolus
GI Bleeding
Graft Failure, Prosthesis or Flap
Hypothermia
Iatrogenic Injury to Organ, Nerve, or Vessel
Iatrogenic Pneumothorax

COMPLICATIONS (cont.)
Major Arrhythmia/Abnormal Electric Activity
Myocardial Infarction
Osteomyelitis
Pneumonia
Pneumothorax
Post-Operative Hemorrhage
Pulmonary Embolus
Sepsis
Small Bowel Obstruction
Soft Tissue Infection
Stroke/CVA
Surgical Site Infection
Urinary Tract Infection (not present at admit)
Ventilator Associated Pneumonia
Wound Infection

ACS AUDIT FILTERS
Ambulance scene time >20 minutes
Absence of ambulance report
Hourly neuro documentation in ED for TBI
Hourly neuro documentation in ED for SCI
Hourly vital signs not documented
GCS <8 w/o airway on discharge from ED
Lap >2Hrs after arrival
Craniotomy >4Hrs after arrival
Transfer in after 3 hours
Any Transfer out of MMC
>8Hrs to initial debridement of an OPEN fracture
Admit to Non-Surgical Service (must be <10% of volume)
Non-Fixation of femoral diaphaseal fracture
Unplanned re-intubation within 48Hrs of extubation
DX @ Discharge of C-Spine Fracture, sublux, or neuro deficit not addressed on admission
Over/Under Triage (Cribari Matrix)

MMC AUDIT FILTERS
Delay of Trauma Attending (L1 – 15min, L2 – 30min)
Delay to OR
Unplanned Admission to the ICU
Unplanned Intubation
Unplanned Return to OR
Unrecognized Mainstem Intubation
Screening & Brief Intervention (SBIRT) not documented (Drug and ETOH)
TXA Administration

PRACTICE GUIDELINE VARIANCE (PGV)
DVT Prophylaxis
C-Spine Clearance
Anticoagulation Reversal
Open Fracture Fixation
Evaluation of Potential Severe Head Injury and Anticoagulants
Emergency Release of Blood
Alcohol Withdrawal Protocol
DVT prophylaxis on discharge
Neurosurgical Response
Orthopedic Response >30 minutes for unstable pelvic fracture
Antibiotic administration within 1-Hour in open fractures
