If you identify an "EVENT" (complications or audit filters) please let the TPM or one of the Trauma PI Coordinators know and send a short email to TraumaPI@mmc.org. You can also leave a confidential voicemail message for the program staff at 662-6777

Trauma Service Morning Report Important Performance Improvement Items

COMPLICATIONS
Acute Kidney Injury
Acute Respiratory Failure
Acute Sinusitis
Adult Respiratory Disease Syndrome (ARDS)
Aspiration/Aspiration Pneumonia
Burn/Wound Cellulitis
Burn/Wound Infection Post Incision
Cardiac Arrest with +Resuscitative Efforts
Central Line Associated Bloodstream Infection
(CLABSI)
CNS Infection
Coagulopathy
Compartment Syndrome
Decubitus/Skin Breakdown
Deep Vein Thrombosis (DVT)
Dehiscence/Evisceration
Drug and Alcohol Withdrawal Syndrome
Empyema
Esophageal Intubation (In-House)
Fat Embolus
GI Bleeding
Graft Failure, Prosthesis or Flap
Hypothermia
latrogenic Injury to Organ, Nerve, or Vessel
latrogenic Pneumothorax

COMPLICATIONS (cont.)
Major Arrhythmia/Abnormal Electric Activity
Myocardial Infarction
Osteomyelitis
Pneumonia
Pneumothorax
Post-Operative Hemorrhage
Pulmonary Embolus
Sepsis
Small Bowel Obstruction
Soft Tissue Infection
Stroke/CVA
Surgical Site Infection
Urinary Tract Infection (not present at admit)
Ventilator Associated Pneumonia
Wound Infection

Wound Ir	nfection
	ACS AUDIT FILTERS
Ambulan	ce scene time >20 minutes
Absence	of ambulance report
Hourly ne	euro documentation in ED for TBI
Hourly ne	euro documentation in ED for SCI
Hourly vit	tal signs not documented
GCS <8 w	o airway on discharge from ED
Lap >2Hrs	s after arrival
Craniotor	ny >4Hrs after arrival
Transfer i	n after 3 hours
Any Trans	sfer out of MMC
>8Hrs to	initial debridement of an OPEN
fracture	
Admit to	Non-Surgical Service (must be <10% of
volume)	
Non-Fixat	tion of femoral diaphaseal fracture
Unplanne	ed re-intubation within 48Hrs of
extubatio	n
DX @ Dis	charge of C-Spine Fracture, sublux, or
neuro de	ficit not addressed on admission
Over/Und	der Triage (Cribari Matrix)

MMC AUDIT FILTERS
Delay of Trauma Attending
(L1 – 15min, L2 – 30min)
Delay to OR
Unplanned Admission to the ICU
Unplanned Intubation
Unplanned Return to OR
Unrecognized Mainstem Intubation
Screening & Brief Intervention (SBIRT) not
documented (Drug and ETOH)
TXA Administration

PRACTICE GUIDELINE VARIANCE (PGV)
DVT Prophylaxis
C-Spine Clearance
Anticoagulation Reversal
Open Fracture Fixation
Evaluation of Potential Severe Head Injury and
Anticoagulants
Emergency Release of Blood
Alcohol Withdrawal Protocol
DVT prophylaxis on discharge
Neurosurgical Response
Orthopedic Response >30 minutes for unstable
pelvic fracture
Antibiotic administration within 1-Hour in open
fractures
